

Information pursuant to Art. 33 of the European REACH Regulation

According to Art. 33 of the European REACH Regulation (Regulation (EC) No. 1907/2006), there are information obligations for suppliers of articles containing so-called substances of very high concern (SVHC) in a concentration of more than 0.1 percent by weight. The European Chemicals Agency (ECHA) has published an overview of all substances included in the REACH Candidate List on its website.

Sustainability is an integral part of Porsche's strategy. Our goal is to use sustainable concepts and materials along all supply chains and to constantly expand their scope and to use substances that are subject to Art. 33 of the REACH Regulation only where they are indispensable for technical reasons. If our vehicles and products contain substances in accordance with Art. 33 of the REACH Regulation, their release is limited to a minimum when handled as intended. The intended handling of our vehicles and products is described in the respective operating instructions. The disposal of vehicles and vehicle parts should always be carried out taking into account the regionally applicable legal requirements.

Model: 982 (June 2025)

The CAS number after the substance name in brackets allows a clear assignment of the substance based on the CAS database.
